The Doggersbank 1400 MJ is known for its very good sailing characteristics on both inland and coastal waters. With the large diesel tanks of a total of 3,000 liters, the motor yacht is suitable for long, comfortable trips through Europe.

No expense was spared in the construction of this Doggersbank 1400 MJ. She is equipped with, among other things, an auxiliary engine with its own propeller shaft, which can also be used for power generation, (albeit dismantled) stabilizers, central heating, hydraulic bow thruster, etc.

The hull was painted in 2021.
